Standardizing Information and Communication Systems

TG1 Convener's Report to TC39
20 March 2002

Officers

Convener: Mr. Peter Torr
Editor: Mr. Waldemar Horwart

Meetings

The following 3 technical meetings of TG1 have occurred since the most recent report:

October 1st, 2001, hosted by Netscape
October 30th, 2001, hosted by Microsoft
November 27th, 2001, hosted by Netscape

Additional planned meetings were cancelled due to conflicts with travel arrangements. The next meeting is scheduled for late April.

Attendees

Meetings have been regularly attended by representatives from member companies Microsoft and Netscape, with representatives from other member companies attending occasionally.

Progress

The group has been working through the initial drafts of the Edition 4 document, and has come to agreement on some previously contentious topics, such as the numeric hierarchy and operator overloading. Mr. Horwat is working on the document independently and the group is reviewing the additions as they are made.

Our proposed timeline from the September report has been pushed back due to slow progress on the Edition 4 document, travel arrangements. As a result the target date for GA approval is now December 2003.

Drafts to be submitted to TC for adoption

None at this time.

Recommendations

None at this time.

Peter Torr

Convener TG1
