

Ecmascript edtion 4 - Check list

| | | | | |
|----------|---|---|--|---------------------------|
| A | | 2 Packages & Namespaces | | 1,2 |
| A | 1 | package definitions | | |
| A | | aliased | | xforms merging namespaces |
| A | 1 | import directives | | |
| A | 1 | namespace definitions | | |
| A | | namespaces are forgable | | |
| A | 1 | use namespace directives | | |
| A | | 3 Classes & Interfaces | | 1,2 send raw specs |
| A | | member definitions | | |
| A | | attributes | | |
| A | | inheritance | | |
| A | | instantiation | | |
| A | | bound method | | |
| A | | class object model | | |
| A | | 4 Expressions & Statements | | 1,2,3,4,5 |
| A | | qualified references | | |
| A | | is | | |
| A | | as | | |
| A | | to | tbd | |
| A | | super | | |
| A | 1 | for-each-in | | |
| A | | try/catch/finally (typed) | is type semantics | |
| A | | multiple catch clauses | | |
| A | | meta data attributes syntax | decorators, need examples, investigate options | |
| A | | attributes | | what does x.@foo do? |
| A | | 5 Variables & Functions | | 1,2,3,4 |
| A | | const | | comp time or write once |
| A | | var | | |
| A | | type annotations | | |
| A | | rest parameters | | |
| A | | optional parameters | | |
| A | | named arguments | needs investigation | |
| A | | accessors ({call get set} {* id}) | | |
| A | | 6 Native types | | 1,3 |
| A | 1 | int, uint | | |
| A | | decimal | | |
| A | | unboxed primitives (e.g. String) | | |
| A | | not null type | | |

A

7 Object model

A

delegation mechanism (see meta object protocol)

A

meta object protocol (overriding get, put, call)

A

1

regexp bug fixes

A

new /re/g

A

object identity

A

8 Internationalization

A

unicode 4

A

9 General

A

strict mode

nested functions default this is the outer this if called from within the outer function
