

**Minutes of the:
held in:
on:**

**Ecma TC39-TG1
Phone conference
29th of May 2007**

Attendees

- Graydon Hoare, Mozilla Foundation
- Lars Hansen, Adobe Systems
- Brendan Eich, Mozilla Foundation
- Francis Cheng, Adobe Systems
- Dick Sweet, Adobe Systems
- Jeff Dyer, Adobe Systems

Agenda

- [Jeff] Wiki changes

Notes

- Wiki changes
 - Dictionary: Too soon to discuss. Lars still working on this, prefers to continue discussion on wiki.
 - Program Units proposal: Jeff posted a proposal about restricting names. Brendan thinks restricting to identifiers may be too restrictive.
- Trac issues
 - Jeff: We're coming up on M0 milestone, so we should defer any open issues that won't be fixed to a later milestone.
 - Lars: RefImpl issues that I marked as M0 are ones that break the SM test suite.
 - Went through each of the M0 issues and assigned and/or deferred each issue.
 - [Issue #7: What is the type of C.prototype?](#) generated the most discussion. Issue deemed important, but unresolved. Discussion will continue in the Trac database, using Trac's comment mechanism.
