

Object.observe

Champion: Erik Arvidsson

Less allocations

The change records can be skipped

```
Object.observe(obj, callback, {  
  skipRecords: true  
});
```

New API

Old:

```
Object.observe(obj, callback,  
               acceptTypes)
```

New API

Old:

```
Object.observe(obj, callback,  
               acceptTypes)
```

New:

```
Object.observe(obj, callback, options)
```

New API - options

```
{  
  skipRecords = false,  
  acceptTypes = [  
    "add", "update", "delete", "reconfigure",  
    "setPrototype", "preventExtensions"  
  ]  
}
```

Updated spec

- New API
- Core algorithms updated to latest ES6 draft
- Ecmakup
- Ecmardown
- On [GitHub](#)

TODO

- Update/add array methods to match ES6
- Clean up non normative text
- Job scheduling
