## Agenda

- Schedule, other administrivia
- Open tickets
- Remove [the operators proposal](#). See [the discussion page](#) for a rationale.
- [The arrays proposal](#), much scaled back since last month, now mostly cementing things we've agreed on already.
- [The vectors proposal](#), a facility for FORTRAN-like arrays built on parameterized types.
- [The generic functions proposal](#), a proposal for multimethods with type dispatch.
- Numbers (3, 4, 83, 123, 138, more to come). See [the discussion page](#) for details.
